

Helping you get the most from Frontier's farm management platform

Welcome the fourth edition of MyFarm Tips & Tricks 2020.

In this edition:

- Accessing the 'Cropping Report' in MyFarm
- Using the 'Draw and Measure' tools in MySOYL.

[Access the Tips & Tricks library](#) to view or download issues already published.

Accessing the cropping report in MyFarm

Did you know that, as well as cropping by season, the 'Cropping Report' available within the Greenlight Grower Management (GLGM) application allows you to view your crop rotation by selecting a specific date range?

Once in the GLGM dashboard, select the 'Reports' menu from the top navigation:

You will be presented with a screen of several tiles, each representing a different kind of report. The 'Cropping Report' is situated at the bottom of the screen, one tile in from the left:

(See image on following page.)

Reports

Spray Plan Report Shows all the spray plans (recommendations) made within a selected date range.	Fertiliser Plan Report Displays all the fertiliser/manure plans (recommendations) made within a selected date range.	Seed Plan Report Displays all the seed plans (recommendations) made within a selected date range.	Inspection Report Displays all the inspections made for the selected crops within a selected date range.	Activity Report See the detailed activity recorded for each crop in the chosen season, within a selected date range.
Summary Programme Report A summary view of the programmes made within the selected date range.	Detailed Programme Report A detailed view of the programme for each crop.	Order Report View all orders raised within a selected date range.	Cost Analysis Report View the current spend on each crop in each field, for the selected cost types within a selected date range.	Gross Margin Report View the profitability of each crop in each field, for the selected season.
Product Use Report See how much of each spray or fertiliser product has been used in plans, programmes or activities, within a selected date range.	Cropping Report See an overview of which crops are in which fields, for either a single season or across multiple seasons.	N-max Summary Report See how the N-max limit of each crop has been calculated alongside the average application nitrogen rate.	EHD Report See which crops are safe to harvest by checking the Earliest Harvest Date (based on confirmed activities) for each crop in each field.	Nutrient Planning Report Displays the nutrient requirement, fertiliser applications, plus the latest soil analysis result for each crop in each field.

Upon selecting the 'Cropping Report' tile, a new screen will load displaying the different crops logged for your farm. Using the drop-down menu in the top right of the screen, you can select the season you wish to view or filter the results to show a specific date range. You can do this by choosing a certain year or you can edit the 'Date From' and 'Date To' fields:

Using the 'Draw and Measure' tools in MySOYL

In some situations you might be required to quickly measure a rough area; for example a game cover strip or the length of a drainage ditch. The 'Draw and Measure' tools within MySOYL allow you do this with ease.

 Draw and Measure

To access the tools enter the 'Map View' and select 'Draw and Measure' from the toolbar on the left side of the screen:

To draw a line, select 'Add line' and click in the map to add points. You can finish your line by double-clicking, at which point you will see the length displayed.

To measure a specific area of a field, select the 'Add polygon' option. Again, click the map to add the necessary points required and double-click to finish the shape and see the completed area:

You can use these 'Draw and Measure' tools on any area of your farm or holding; they are not limited only to areas you have mapped with SOYL. Once you have drawn your polygons and links, you can easily print them as a PDF by using the 'Map Print' feature.

Log into MySOYL
