YaraMila™ NK SULPHUR

24-0-13+5%SO₃

- a compound fertiliser that can be utilised for high phosphate, low potash soils deficient in sulphur
- often used to plough back in potash removed during silage off-take or as a top dressing for cereal who have had a base dressing at sowing but need additional potash and nitrogen late in the season

Recommendations

Crop	Recommendation & Timing
Grass	Follow 'The Grassland Rule' 2 units N /acre/day (2.5kg N/ha/day)
